

Career Opportunities

Product Developer

Who we are Hanwha Azdel Inc. manufactures high-performance thermoplastic composites designed for both interior and exterior applications across many different industries. Major segments served include automotive, heavy truck, recreational vehicles, industrial, and other transportation applications. Hanwha Azdel Inc. is an affiliate of Hanwha Living & Creative (L&C) Corporation, which is a division of Hanwha Group, the fifth largest Korean conglomerate with 30,000 employees worldwide and a wide range of composite material businesses.

Who we need

Hanwha Azdel seeks technically strong, high-energy, goal-focused individuals who are proactive in problem solving and have the leadership and communication skills needed to help a diversified global business achieve its goals. Successful candidates will work with Hanwha Azdel's customers, product/process developers, laboratory technicians, as well as the manufacturing, quality and commercial teams.

Product Developer: The product developer is responsible for leading development activities associated with new and existing products as well as advanced new method development. The product developer must be able to solve technical problems associated with Hanwha Azdel products and laboratory test methodologies. The product developer will drive new technology introductions, new product introductions, and product management of change to support the growth of Hanwha Azdel. The product developer will also identify and implement innovative new product technologies for break-through product performance in order to build the pipeline for future growth, and optimize existing product technologies for improved product performance.

Specific Requirements: PhD in a field related to polymer/material science/engineering, chemical engineering, or mechanical engineering, or MS with at least 5 years of industrial experience. Experience with wet-lay production methods is a plus.

What we offer

At Hanwha Azdel, you will enjoy the rewards of a competitive salary, an outstanding benefits package and the professional advantages of an environment that supports your development and recognizes your achievements.
